

BROWNS BRAIN

THERE'S NOTHING SMARTER THAN A BRAIN!

POWER FAIL LIGHTING BB015

The Browns Brain power fail lighting, **BB015**, is a brand new alternative to searching for flash lights or candles whenever the power goes out! Installed in any standard light bulb socket, it will automatically provide light during a power failure and will turn off again when the power is restored. All this without any stumbling in the dark. The BB015 has a no-maintenance rechargeable battery that will provide hours of lighting during a power failure! And it automatically senses the loss of AC power—totally automatic and worry free!

Provides pleasing white LED lighting for power fail situations.

...hey... Don't be left in the dark! Get some power fail lighting from BROWNS BRAIN!
